# Plant Warranty

## SUMMARY:

Warranty covers one growing season

Nelson Design Associates should be contacted when plant health shows significant deterioration so recommendations can be made to save the plant.

If the plant does not survive, it will be replaced at no cost.

***Nelson Design Associates*** provides a warranty on all plant material as part of the total plant purchase unless otherwise requested by the client.

The warranty covers all plants for one growing season. Nelson Design Associates must be contacted when the plant shows signs of deterioration so a corrective course of action can be recommended. If the plant still does not survive, it will be replaced with the same or equal valued plant at no cost to the customer.

Warranty does not cover plants that have been damaged from weather, vandalism, animal damage, other externalities, or acts of God. Plants that have been underwatered, overwatered, or watered with softened water will not be covered (see watering guide).

Owners shall, to the best of their abilities, make all efforts to keep their plants alive and healthy.
